# Unpack, connect, and you're done

Ready-to-connect PTFIX distribution blocks  
with Push-in Technology

# The innovative PTFIX distribution block system with Push-in connection

As automation becomes increasingly common, the number of sensors and actuators is also increasing – making potential distribution or collection more complex as a result. The demands on the connection technology used are numerous and unique. The intelligent PTFIX distribution block concept reduces your assembly times and has the right solution for every application.

# Ready-to-connect PTFIX distribution blocks with Push-in connection

PTFIX distribution blocks are delivered ready to be connected, in different numbers of positions and mounting types. They can be used straight away and expanded as needed. Thus, PTFIX blocks ensure flexible and cost-effective load and control current distribution.

The Push-in connection technology enables you to insert wires quickly and easily. Even small conductors from 0.34 mm<sup>2</sup> can be connected reliably without using tools. Simply use the push button for disconnection purposes and to connect stranded conductors without ferrules.

 Web code: #1395

## Space-saving DIN rail mounting

Distribution block versions for transverse mounting on the DIN rail allow a high wiring density and space savings of up to 50 percent.

## Unpack, connect, and you're done

Ready-to-connect blocks enable fast assembly without manual bridging, offering time savings of up to 80%.

## Intuitive and secure installation

Distribution and power blocks with 6, 12, and 18 terminal points for intuitive and secure installation are available in eleven colors.

## Customized expansion

The distribution blocks can be arranged and expanded, checked, and marked individually with two-pos. plug-in bridges from the CLIPLINE complete system.

Push-in Technology   
Designed by PHOENIX CONTACT

### DIN rail mounting

The distribution blocks for mounting on 35 mm standard DIN rails enable clear and convenient cable routing. Distribution blocks for mounting on 15 mm standard DIN rails are available for use in small junction boxes.

### Mounting type: self-assembly

The basic blocks can be individually assembled with different adapters or flanges in accordance with the desired mounting type.

### Tool-free mounting

The self-adhesive distribution blocks can be quickly and easily mounted on flat surfaces with no need for preparation or tools.

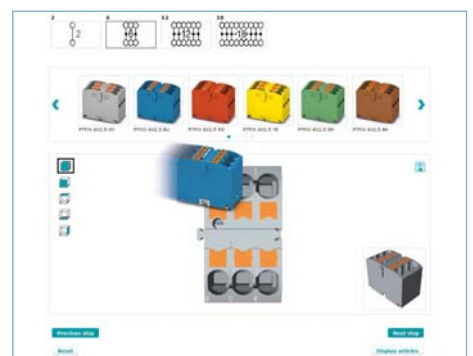

# Configure and order distribution block solutions online

PTFIX distribution blocks and single layers provide you with countless combination possibilities. Our new online configurators provide you with support in the creation of your customized distribution block solution. Configure your distribution blocks with just a few entries, thanks to simple menus, 2D and 3D product images, and intuitive user interfaces: easy to create and easy to order.

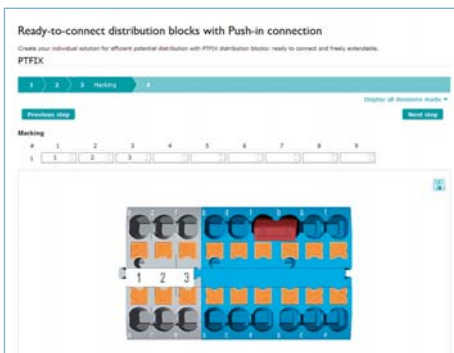

## Easy repeat ordering

You can reorder your distribution block configuration at any time via the automatically generated solution ID, without having to enter additional information.

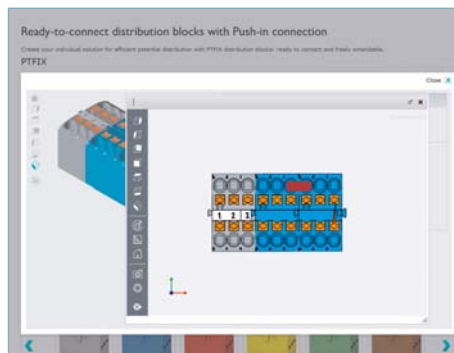

## Product selection

Depending on your requirement, start by combining the appropriate blocks and individual layers in accordance with cross section, number of terminal points, colors and mounting type.

### Customize the product

Specify the printing and accessories for your custom solution.

### 2D and 3D CAD data

Download design data in 2D and 3D format so you can use it directly in your CAD software.

### Request a quote

Send us your request directly from within the online configurator. We will prepare a non-binding quote for your individual configuration.

## In dialog with customers and partners worldwide

Phoenix Contact is a globally present, Germany-based market leader. Our group is synonym for future-oriented components, systems, and solutions in the fields of electrical engineering, electronics, and automation. A global network across more than 100 countries, and 16,500 employees ensure a close proximity to our customers, which we believe is particularly important.

The wide variety of our innovative products makes it easy for our customers to find future-oriented solutions for different applications and industries. We especially focus on the fields of energy, infrastructure, process and factory automation.

You will find our complete product range at:
